<b>Office Hours Office Location</b>	By appointment		

## I. Course Overview

### 1. Course Description

This course introduces students to the interdisciplinary field of criminal psychology, offering a comprehensive overview of the psychological principles underlying criminal behavior. Designed for non-majors with an interest in understanding the psychological aspects of crime and justice, the course provides a foundational understanding of the interactions between human behavior, cognition, and the criminal justice system. Students will explore various theories of crime causation, including biological, psychological, and sociological perspectives, to comprehend the multifaceted nature of criminal behavior. Emphasis will be placed on analyzing the psychological processes influencing criminal decision-making, the development of antisocial behavior, and the interplay between mental health and criminality. By the end of the course, students will have developed a foundational understanding of criminal psychology, enabling them to critically evaluate the psychological explanations of criminal behavior and its implications for society, law enforcement, and the legal system.

### 2. Prerequisites

This course does not require prior knowledge of psychology and serves as an entry point to the field of criminal psychology.

### 3. Course Format

Lecture	Discussion/Presentation	Experiment/Practicum	Field Study	Other
60%	20%	%	%	20%

### 4. Course Objectives

- Understand Psychological Principles: Grasp the foundational psychological explanation on criminal behavior, including biological, psychological, and sociological perspectives.
- Apply Psychological Concepts to Real Cases: Apply learned theories and principles to analyze and understand actual criminal cases, developing critical thinking skills in the process.
- Facilitate Discussion and Engagement: Foster an environment that encourages active participation, discussion, and exploration of ideas among students, promoting a deeper understanding of the subject matter.
